

Hello,

I hope you're doing well. I'm currently a graduate CS student at the Stony Brook University. I have prior experience of two and half years as a software engineer at Samsung R&D India, where i have extensively worked on virtual assistant tasks. I am currently looking for Software Engineering Internship opportunities for the summer of 2017.

I have attached my resume to this mail. If you're aware of positions where I might be a potential candidate, please consider my candidacy for an interview opportunity.

Thank you for your time.
