## EMPLOYMENT

---

- |  |  |   |
|--|--|---|
| <b>Senior Applied NLP Scientist</b>  | <b>Walmart Labs</b>                    | <b>June 2020-Present</b>  |
| <ul style="list-style-type: none"><li>Developed an entity linking model to recognize the products and its facets for Walmart's voice reorder system.</li></ul>   |  |   |
| <b>Applied Scientist III - NLP</b>   | <b>Walmart Labs</b>                    | <b>Jul 2018- May 2020</b>   |
| <ul style="list-style-type: none"><li>Implemented an Active learning system to automatically select the training examples from the pool of live user utterances to improve the NLU system performance by 5-7 % in Walmart Scale. Online Learning Vowpal Wabbit.</li><li>Applied dynamic English and Spanish entity extraction model training and Optimization to enable self-service entity extraction models training in Guru Platform for Walmart US, International, Sam's Club US. Autoencoder Language model Google BERT, Conversational Representations from Transformers, GPU, Seq2Seq, A/B Testing.</li><li>Built Intent determination models to predict the utterance skill by above 96% accuracy in Ask Sam English, Spanish Conversational AI. Docker, Java, Python, TensorFlow, Sklearn, Predictive Modeling, AWS, Cosmos Db.</li></ul> |  |   |
| <b>Patent:</b> U.S. 62,840,991: "Systems for processing information requests of retail facility workers (Ask Sam)."  |  |   |
| <b>Invited Speaker Talk:</b> Rasa Developer Summit 2019<br>Conversational AI in Walmart Natural Language Processing  |  | San Francisco, California<br>Sept 24, 2019                        |
| <b>Senior Machine Learning Engineer</b><br>Intelligent Services  | <b>Samsung Research</b>                | <b>Feb 2016-Dec 2016</b><br>Spot Award – October 2016             |
| <ul style="list-style-type: none"><li>Improved Bixby NLU latency for some utterances by 60% by implementing a decision-making model to predict the context switch between In-Domains like Call, SMS, and out-Domains like wolfram alpha, web search.</li></ul>   |  |   |
| <b>Machine Learning Engineer</b><br>Bixby NLP Research   | <b>Samsung Research</b>                | <b>July 2014-Jan 2016</b><br>Employee of the Month – January 2015 |
| <ul style="list-style-type: none"><li>Built the multiple versions of Bixby English, Spanish NLU (intent classification models in Bixby of Galaxy S6, S7, S8 mobiles), named entity recognition models using supervised machine learning models LSTM, Neural networks, SVM, conditional random field.</li><li>Predicted the new intents to virtual assistant from the pool of unlabeled big data logs using the k-means clustering algorithm to improve NLU performance by 6-8 %.</li><li>Implemented contacts ranking system on name disambiguation list to enable the Bixby hand free auto-calling.</li></ul>   |  |   |
| <b>Graduate Research Assistant</b>   | <b>NLP Lab, Stony Brook University</b> | <b>Jan 2017-Dec 2017</b>  |
| <ul style="list-style-type: none"><li><b>PrIA (Privacy-Focused Intelligent Assistant):</b> Developed an intelligent privacy system that predicts user personality by entity-based sentiment analysis using their private data under the guidance of Prof. Niranjana Balasubramanian. Deep Learning sentiment analysis, Fine-grained entity recognition, AFINN.</li></ul>   |  |   |

## EDUCATION

---

- |  |                         |   |
|--|-------------------------|---|
| <b>Stony Brook University</b><br>Master of Science in Computer Science   | <b>Stony Brook, NY</b>  | <b>Jan 2017-May 2018</b><br>Winner of Bloomberg Code Con-SBU 2017 |
| <b>Osmania University</b><br>Bachelor of Engineering in Computer Science | <b>Hyderabad, India</b> | <b>Oct 2010-May 2014</b><br>National Merit Scholar (2010-14)      |

## PROJECTS

---

- Natural Language Processing:** Developed a personalized news recommender system that collects user's Personal data builds a knowledge profile graph and recommends news articles based on the profile, all locally on the user's device. Stanford Core NLP. (Spring 2017)
- Computer Vision:** Built an intelligent system to predict how good an app or game based on its gameplay videos, screenshots, application description, and other trivial app-related data with an MSE 0.31. Image Processing, Convolution neural network (CNN), Automated essay scoring. (Fall 2017)

## LANGUAGES AND TECHNOLOGIES

---

- Python; Java; C++; C; NoSQL; MySQL; Shell Scripting; Matlab; Klein; Kernel Programming; Databricks; Keras
- PyTorch; scikit-learn; Numpy; TensorFlow; Pandas; Open CV; Language modeling; Spacy; Azure; Docker; Rasa
